MADE FOR SPACE

NEW MANUFACTURING OPPORTUNITIES

The global space industry is booming and is set to be worth over £400 billion by 2030. The UK space sector has trebled in size since 2000 and with further significant growth predicted, presents a major opportunity for high-value manufacturing companies.

Made for Space is a two-day intensive conference examining the opportunities and challenges for manufacturing within the global space sector. Made for Space brings together international experts from both the space and advanced manufacturing sectors who will show how new manufacturing technologies can help to address the challenge of producing the next generation of space hardware.

Delegates will get insights into the cutting edge research and new innovations being developed by academia and demonstrated on an industrial scale by the High Value Manufacturing Catapult, pushing forward technology for the benefit of UK manufacturers.

KEY TOPICS:

- ▶ Additive manufacturing
- ▶ Automation and robotics
- ▶ Surface engineering and high performance coatings
- ▶ Advanced joining technology

OTHER FEATURES:

- ▶ All-day exhibition space accompanied by refreshments and networking
- ▶ Breakout sessions with international experts in the space and advanced manufacturing sectors

MADE FOR SPACE

NEW MANUFACTURING OPPORTUNITIES

WHY EXHIBIT?

Made for Space will give our exhibitors a broad range of opportunities to interact directly with delegates and benefit from the broad reach and interest generated by the MTC.

Exhibiting provides an excellent opportunity for you to reach senior decision makers in the UK manufacturing sector. The conference will welcome delegates from large manufacturers as well as SMEs, giving you access to both audiences and an opportunity to interact directly with delegates who are specifically interested in manufacturing for the space sector.

Exhibition spaces are limited, if you are interested please email: space@the-mtc.org
